WORK EXPERIENCE

**POKER DEALER/
CHIP RUNNER/
DESK CLERK**
2007 - 2014

• MORONGO CASINO RESORT AND SPA, CABAZON, CA

At the Morongo poker room I took on three different job titles at the same time. I started as a desk clerk and chip runner. In my roles there I had a great deal of customer interaction I found enjoyable. My duties included selling chips and buying back chips from customers, seating players and tracking the poker games, dealing Texas Hold'em and 5-card Omaha.

**CAD DRAFTER/
BIM DESIGNER**
2013 - 2021

• SOUTHERN CALIFORNIA WEST COAST ELECTRIC, BEAUMONT, CA

In my eight years at West Coast Electric I was able to pick up areas of software and knowledge I wouldn't have thought I needed as much as I do now. My duties included AutoCAD drafting, Revit Electrical BIM Design, 3d modeling, Photoshop, MSLA 3d printing, large format printing with plotters, vinyl cutting, light Project Engineer duties, and light office IT duties.

EDUCATION

**3D CHARACTER
DESIGN COURSE**
2016 - 2016

• GNOMON SCHOOL OF VISUAL EFFECTS

I studied with Gnomon in the summer of 2016 completing a character design course taught by a veteran Walt Disney Animation Studio artist. I still study with the Gnomon Workshops which is the online pre-recorded courses version of Gnomon School.

**SELF-PACED
LEARNING AND
RESEARCH**
2011 - PRESENT

• ONLINE LEARNING AND TRAINING

Not that commonly listed on a resume yet, but most of my knowledge and ability to understand computer software comes from my time spent researching, reading, watching tutorials, and completing training modules I found on Google and YouTube. I search for tutorials, lessons, and training modules to purchase and further my education on design of many sorts. Using Google and YouTube along with my hands on experience at West Coast Electric I was able to become an Autodesk AutoCAD Certified Professional, Revit Electrical Certified Professional, and 3d designer.
